Neighbourhood involvement is about working together to bring out the best in our communities and to get the most out of our services.

The challenge is;

- to create and support a strong community
- help services and voluntary groups respond to local needs
- support councillors in their role as community leaders
- to have co-ordinated neighbourhood activity and joined up services

Together we can achieve this by;

- forming an area plan to respond to local needs and priorities
- delivering an area plan through the neighbourhoods area board and its working groups
- ensuring we all work together to achieve this

Together we will;

- engage and involve the whole community and celebrate our successes
- improve quality of life for people living and working in our neighbourhoods
- offer funding for local groups
- recruit local people to working groups
